Empanadas Recipe

1. Take out the empanadas disc so that they can defrost while the beef is cooking.

2. Cook the beef anyway you prefer.

3. But if you want to cook the beef as done in that video take defrosted beef and put it into either a pressure pot or a pan on the stovetop.

4. Put 2 tablespoons of recaito, Adobo, salt, 1-2 packets of Sazon, garlic powder, and enough tomato sauce that you go once around the pot into the meat.

5. Take the cooked meat and put about 1-2 tablespoons in the middle of the empanada discs.

6. Fold it over, without breaking the dough, and press all around with a fork to close it.

7. Then take the empanada and put it into the oil and brown on both sides.
